Children never stop learning and are eager to experience and explore – they have a tiring energy. SmartKids, well respected for its structured program during the day, now offers a challenging guided edutainment program during our after-school activities. The programs are an entertaining, educational way to engage kids and keep their curious minds working.

From physically active parachute games that teach social cooperation to kite-making projects good for rainy afternoons; these after-school activities will provide hours of learning and laughs for your kids and their friends.

Our after school activities offered weekly under the guidance of our Foreign Teachers with Vietnamese assistants, are always 100% English spoken and limited to 18 children.
